Fast Lane

Cloud Adoption Assessment

Recommendations for action and high-level design for your AWS Cloud migration

aws PARTNER Advanced Tier Services

Are you planning to migrate one or more services/workloads to the AWS cloud and need support in evaluating the project and planning the migration? With our Cloud Adoption Assessment, we provide you with an individual recommendation for action with a high-level design for your migration project.
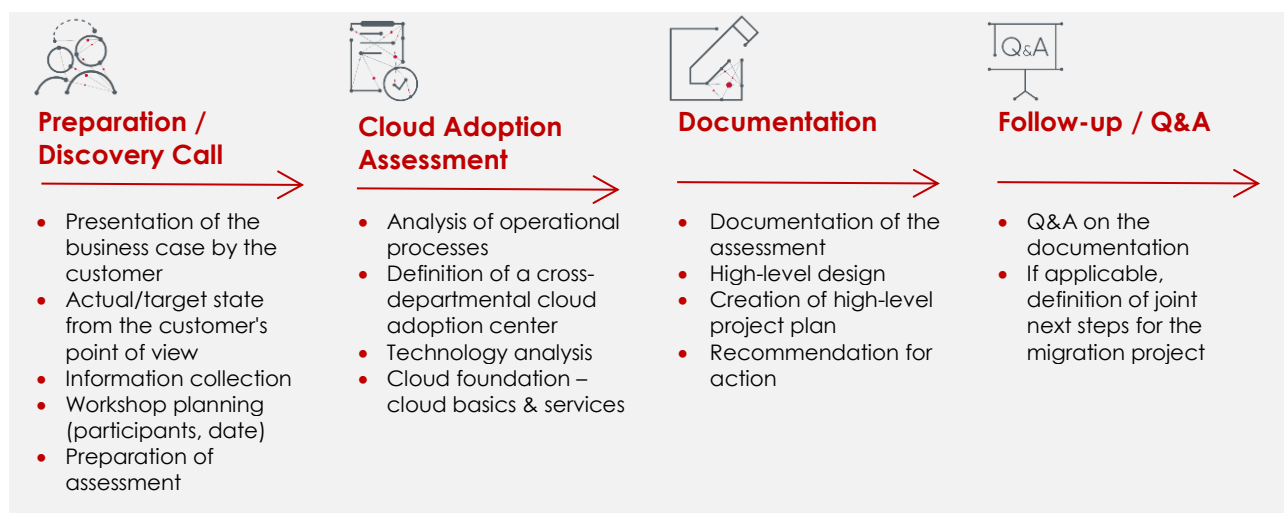

Scope of services

The Cloud Adoption Assessment supports you in the initial analysis phase of your cloud migration. If required, we can also advise you on the subsequent migration steps.

1. Analysis / Assessment
- Vision / goal definition
- Cloud adoption check

2. Planning / Piloting
- First use case in the cloud
- Creation of a roadmap

3. Migration / Adoption
- Cloud migration
- Development of new cloud services

Approach

Our Cloud Adoption Assessment is used to evaluate and analyze your company-specific environment and the possibilities of a cloud migration. The goal is to obtain a common understanding of the cloud and to develop corresponding recommendations for action for your individual migration to the AWS cloud (high-level design and project plan). We conduct the Cloud Adoption Assessment remotely.

Preparation / Discovery Call
- Presentation of the business case by the customer
- Actual/target state from the customer's point of view
- Information collection
- Workshop planning (participants, date)
- Preparation of assessment

Cloud Adoption Assessment
- Analysis of operational processes
- Definition of a cross-departmental cloud adoption center
- Technology analysis
- Cloud foundation – cloud basics & services

Documentation
- Documentation of the assessment
- High-level design
- Creation of high-level project plan
- Recommendation for action

Follow-up / Q&A
- Q&A on the documentation
- If applicable, definition of joint next steps for the migration project

Prices and further information
