Fast Lane

WHAT IS LEARNING-AS-A-SERVICE?

Fast Lane's LaaS solution offers a programmatic approach to learning, providing a totally immersive and customizable offering.

Research shows that learners who have the opportunity to interface in real-time with peers or an expert are more likely to succeed.

LaaS delivers fully interactive learning paths that include dedicated support from qualified experts as learners progress through material at their own pace.

If you have a team and wish to accelerate the adoption of new technologies, Fast Lane's LaaS offering can be implemented and adapted to meet your specific business goals. We leverage a branded, scalable platform with single sign-on user experience to define learning tracks and service capabilities that can be tailored for you.

Engage your learners with immersive programs designed for your organizational goals.

Learning Catalogue: Leverage hundreds of titles through our partnerships with high-end technology companies

Learning Gap Analysis: Assess the skill levels of your employees and create learning paths that achieve your goals

Content Development and Conversion: Tailor content specifically for your organization and learners

Virtual Labs: Gain hands-on experience through course-related remote learning labs

FAQ: Access comprehensive, course-based FAQs to quickly get answers to key questions

AICP Canada

Fast Lane provided a microsite for this customer with access to 8 role-based learning paths. The site includes information on suggested self-paced training, instructor-led training, exam prep sessions, and additional Microsoft Learn content and exam vouchers.

GE

This customer was driving a transition from an AWS solution to Microsoft Azure. Fast Lane developed an inclusive approach to drive buy-in while at the same time developing learning content to facilitate adoption by highly technical, experienced users. This customer leveraged multiple solutions to achieve their goals and address learners at different knowledge levels. These included:

- Customized assessments to determine individual skill levels
- Tailored classroom certification courses with built-in hackathons
- Curated learning paths through self-paced MOOC content and certificates

For large groups, this customer also utilized our exclusive 4-hour Immersion Workshops, a learning modality that focuses on a specific micro topic in an expanded fashion with multiple learning objectives. All of this content was hosted on our LaaS platform with tracking and analytics which were used by the customer to understand both outstanding challenges and opportunities as they move workloads to the powerful Azure platform.

OUR LAAS CLIENTS

OPTIMIZE YOUR LEARNING APPROACH

Fast Lane's dck Yfž ``@UUGˇgcˇi hˌcbˇWfYUhˌYˇgˈUbˇcdhˌaˌ]nYXˇ

DESIGN

Through assessments, job task analysis, enablement goal capture and organizational interviews, we help determine the most effective and efficient learning paths for your team.

METHODS

Not all students have the same learning needs. LaaS can be customized to utilize live online training, self-paced courses, video, labs, and coaching to tailor the learning experience.

SUPPORT

Our LaaS offering can provide learners access to a custom-branded platform that hosts role-based learning paths and provides analytical reporting for tracking and monitoring student progress.

REINFORCEMENT

Help learners master and sustain their new skills through our opportunities for continuous learning and coaching, including learner communities, practice tests, and workshops.

We know that scalability is key and that job roles and responsibilities can vary significantly between and within organizations. Our LaaS approach adapts to your specific requirements"

If you require a custom solution for your organization, we are here to help.
